HERE'S WHY IT WORKS:

[Learn More](#)

We at MG Scientific are thrilled to introduce the latest line of serological pipets from CellTreat / VistaLab, designed to elevate your laboratory experience to new heights! With two contact zones for increased stability, you can trust the Wobble-nots to deliver precise and accurate results. Graduations are bi-directional and printed in bold ink to ensure clear, easy-to-read, and reliable measurements for your experiments. The patented two-tier design also allows Wobble-not pipets to be universally compatible with any pipet controller. Contact us today to learn more about these innovated serological pipets and how they can benefit your lab!

NEW! Store Items

At MG Scientific we are constantly adding new products to our offering. Below is a small selection of some of the newest product offerings from our manufacturing partners. We invite you to explore what's new. As always, if you would like assistance finding the items most important to you and your analytical applications, please send your request to customerservice@mgscientific.com

FACT[®] chemical

Pipets and pipettor technologies are constantly evolving- with advancements such as electronic pipettors, robotic pipetting systems, and pipetting software- to enhance accuracy, precision, and automation in liquid handling tasks. The inventor of the pipette, Louis Pasteur, was also responsible for the invention of pasteurisation; used to eliminate pathogens in milk and other edible goods.
