Honeywell

Hydranal

Karl Fischer Titration

A wide range of pyridine-free Karl Fischer reagents for both volumetric and coulometric titrations for nearly all types of samples, complemented by a broad range of standards.

Reagents

For different and diverse analytical applications, including indicators for different titration methods, reagents for gravimetric analysis, derivatization reagents, and eluents for HPLC, LC-MS and UHPLC. Our extensive purification and quality controls ensure products meet the highest specifications possible.

Chromasolv

Riedel-de Haën's high-purity

ChromasolvTM product lines deliver superior purity, stability and lot-to-lot consistency, making them ideal for a variety of analytical and preparative separations utilizing LC-MS, HPLC, GPC and Spectrophotometric analysis.

- LC-MS solvents
- Plus- multipurpose
- Gradient solvents
- HPLC instrumentation

TraceSELECT

TraceSELECT reagents

Our TraceSELECT and TraceSELECT Ultra products for trace analysis at ppb and even ppt levels are produced by sub-boiling distillation.

TraceSELECT Solvents

High-purity TraceSELECT Solvents for speciation analysis by LC-ICP-MS. TraceSELECT solvents undergo rigorous purification procedures followed by UV spectroscopy, IC, and ICP-MS testing to assure high chemical purity and high UV transmittance. The blank values for metal traces in these solvents are in the ppb range or lower.
