

MGS Green Initiative - Supporting Sustainability Since 1985

Since 1985, MG Scientific has been a reliable partner to the scientific community, delivering high-quality chemicals, laboratory products, and scientific equipment for a broad range of research and analytical needs. As laboratory practices have evolved, so too has our dedication to sustainability. As a dedicated distributor to the scientific community, we understand that advancing science and protecting the environment go hand in hand. We are proud to support and promote innovation in eco-friendly laboratory products, aligning our efforts with the growing demand for sustainable solutions in research and development.

Understanding the need to minimize our environmental impact, MG Scientific began transitioning toward more sustainable operations several years ago. We adopted a paperless office system, installed automated temperature controls in our warehouse, upgraded to energy-efficient LED lighting, and introduced a hybrid remote work model. These initiatives have played a key role in significantly reducing our carbon footprint.

TWIRL'EM® Ecolo Green Initiative Bags

Many of our trusted manufacturing partners are leading the charge by implementing significant changes across their operations, including:

- Transitioning to renewable energy to power production facilities
- Redesigning packaging using recyclable or biodegradable materials.
- Developing energy-efficient laboratory equipment that reduces environmental impact without compromising performance.
- Adopting ACT (Accountability, Consistency, Transparency) labeling, helping labs make informed choices based on a product's sustainability profile.
- Launching recycling programs for lab consumables that were once single-use and non-recyclable.

Related Products

We're proud to collaborate with suppliers who share our vision of a more sustainable future for science. Together, we're helping laboratories reduce their environmental footprint—without sacrificing the pursuit of innovation.
