

## Thermo Scientific Promotional

As fall approaches and many labs are considering how best utilize remaining capital budgets, MG Scientific wanted to inform you of several special promotions being offered by our partners at Thermo Scientific. Whether you are expanding your laboratory or simply in need of replacing obsolete equipment, the timing is ideal to take advantage of these temporary offers. Featuring great deals on ultra-cold storage equipment, incubators, and shakers, we encourage you to look further into these great deals.

### TSX Refrigerator

### Revco Freezers

### Orbital Shakers

Save up to 10% - Offer available through December 31, 2022

#### Heratherm Incubators

- Temp range +5 to +70°C
- Corrosion-resistant stainless steel
- Exceptionally small footprint

[Learn More](#)

Offer available through December 31, 2022

#### FACTinventory

The process known as refrigeration is conducted within five main components:

- The Refrigerant: a liquid/gas that flows through and cools the system
- Inner Tubing: pipes which absorb heat to exchange with cool air
- Outer Tubing: pipes which expel heat into the air
- Compressor: motor which raises gas pressure inside the system and liquefies it
- Expansion Valve: releases the pressurized gas to transfer heat from the interior

#### Solaris Orbital Shakers

- Variable speed control; 15-25rpm
- Used in a variety of environments
- Full-color touch screen display
