

## Back to School Chemical Supplies

As you all are working hard to prepare for the upcoming fall semester, MG Scientific wanted to send a friendly reminder that we are here to support the needs of the higher education science community.

From Acetone to Xylene, we have the chemical supplies you need to get your cabinets ready for the incoming class.

Don't forget Ethanol. MG Scientific stocks and supplies Ethanol in un-denatured and denatured forms to support the research work being done at colleges and universities across the nation. With an ample supply of both 190 & 200 proof ethanol products ranging from pint size to 5 gallon containers, we are ready ship the day you place your order.

MG Scientific also provides an extensive array of other laboratory chemicals including solvents, acids, dry chemicals and chemical solutions used in a wide variety of academic research applications. We offer chemicals in the following grades: ACS, HPLC, NF, USP and FCC. Please visit us at [www.mgscientific.com](http://www.mgscientific.com) or call us at 1-800-343-8338 and we will help you find the products you need all at exceptional prices.

MG Scientific distributes several brand names of chemicals including: J.T. Baker, Macron, Honeywell, EMD, Sigma, Ricca, Avantor, LabChem, Pharmco.

***MG Scientific is a U.S. Government Licensed Distilled Spirit Distributor. Routinely warehoused and available for immediate distribution is a wide selection of Pure Ethanol (Undenatured) products. GMP World grade, USP, ACS, FCC, HPLC, UV grades available.***

## Pure Ethanol Products Can Be Purchased Tax Free!

To purchase Pure Alcohol (Ethanol) Tax Free, an Industrial Alcohol User Permit issued by the Alcohol & Tobacco Tax Trade Bureau is required. This permit is required to be on file with the distributor prior to sale. Pure Alcohol (Ethanol) products may be purchased without an Alcohol & Tobacco Tax Trade Bureau permit; however, sale of pure alcohol

without permit is taxable at the rate of \$13.50 per proof gallon. Proof gallon is calculated as U.S. Gallons multiplied by the proof of the product, divided by 100. 100% of taxes collected by MG Scientific are forwarded to the U.S. Government. No additional fees! No Mark Up's!

## High Purity Solvents

*Do you need an SDA formula as a solvent, as raw material, as a fuel, or as a fluid? MG Scientific has solutions for your needs. And remember that any SDA Formula can be used as a "base formula" to create a "variant formula" with increased solvents. We also have Special Industry Solvents (SIS) and High Quality Grain Neutral Spirits (GNS).*

**PHARMCO**  
by Greenfield Global

1. Pure Ethanol Products– Pure and Denatured in pints to tank-truck quantities
2. Ethanol Blends– approved Government formulas with co-solvents
3. High Purity Solvents– production and lab processes for Critical Manufacturing Applications. cGMP, Global-Compendia and Analytical Grades
4. Custom Blends– Process Applications in Production Quantities for ethanol and solvents in production quantities
5. Sterile Products– Process Applications in Production Quantities for critical process applications

***Search on-line to see what standard solutions MG Scientific has for your lab or call MG Customer Service for a Special Formula that can be created to fit your needs- 800.343.8338***
