

Staying Safe as You Return to the Lab

Now that you are returning to the lab, MG Scientific wants to help you stay safe. Here are some suggestions. Avoid sharing commonly used hand-held devices. Create redundancy where small bench-top equipment is used. Clean thoroughly. Protect and monitor your employees. MG Scientific has created a central location to gather information and see the added products that will continue to help your lab remain efficient and safe as you return to normal schedules. Please use this link to visit the page [Covid-19 Information and Solutions](#) for more specific information about covid-19, products, equipment, and MG solutions for your lab. Here are a few newly added items:

- < *Globe Single use Face Shield*
- Hand Sanitizer*
- Isopropyl Alcohol*
- PCR Reagents*
- UV Chambers*

- < *Dynalon Counter-top Plastic Shields*
- Infrared Non-contact Thermometer* >
- Fingertip Pulse Oximeter* >

Eppendorf Social Distance Initiative

In an effort to support Social distancing within the work place, Eppendorf has come up with a current initiative to make it cost effective to equip your staff with the tools they need. Sharing common devices like Pipettors and Centrifuges, while historically common, may lead to unnecessary contact amongst co-workers and increased foot traffic to retrieve equipment from one work station or another. Each step increases the potential for exposure. With great deals on Eppendorf Research Plus Pipettors and Micro centrifuges we can help you maintain a safe work environment.

Temporary offer ending June 30, 2020. To request a quotation please contact Robert McGregor at rmcgregor@mgscientific.com or call 262-237-9639.
