TSX Series— Energy Star Certified

Redefining sustainability, the **TSX Series** is **ENERGY STAR Certified** with a 32% efficiency improvement, **ACT** labeled, and is produced in our Zero-Waste to Landfill certified facility. **TSX Universal ULT** is the pinnacle of reliability, sustainability, and innovation. Designing sustainably, we reduce environmental impact. **ENERGY STAR Certified** and +32% more efficient than our standard TSX series, our ULTs align with global sustainability goals.

MG GREEN Initiative

DWK EcoVadis, Bronze—

DWK Life Sciences is proud to announce that the company has been honored with a **Bronze Medal** by **EcoVadis** in recognition of its steadfast commitment to establishing a sustainable organization, with melting furnaces and a diverse range of products encompassing glass and plastic compounds.

DWK Life Sciences remains steadfast in its mission to implement environmentally friendly practices, reduce its carbon footprint, and promote sustainable innovation within the industry.

FACT general

Dating back to 1970, Earth Day has been recognized by people across the globe in a conscious engagement to consider and address conditions that threaten the health of the world we live in. On April 22nd, we will celebrate the 54th anniversary of Earth Day and MG Scientific wanted to show case, what its manufacturing partners have been doing to support a greener planet. We encourage you to learn more about these industry leading companies and their sustainability efforts.

Corning EcoChoice—

Corning Life Sciences create innovative products and technologies that enable you to develop and deliver life-saving therapies. We recognize our planet's resources are finite and climate change presents a real and growing concern, so we are reimagining product development by incorporating **Design for Sustainability (DfS)** into the processes, with a more environmentally friendly and diverse mindset to our innovation efforts.

“Sustainable design applies across the full life cycle of a product, from product development to manufacturing, shipping, and end-of-life.”
