

MG Scientific - Chemicals & Media

Whether used for laboratory research and experimentation or in the production of high precision products such as pharmaceuticals, MG Scientific offers an enormous selection of chemical products to support your scientific applications. Featuring a comprehensive selection of trusted brands and chemical grades including Reagent, ACS, HPLC, LC-MS, USP, FCC, and NF, MG Scientific is well positioned to support your scientific work with high-quality, quality-assured chemical products.

Bio Synthesis Reagents

High purity reagents for Biosynthesis workflows

Undenatured Ethanol

Used for sterilization, tissue preservation, personal care products, and flavor extractions

Hydranal

Reagents, Certified Water Standards and Auxiliaries for Accurate Karl Fisher titrations

ISO 17034 Certified Reference Materials

ICP, AA, ICP-MS, IC, pH, & conductivity standards, and reference materials

HPLC Solvents

Chromatography solvents to support precise, reproducible separations

LC-MS Solvents

Extensive quality control to ensure that these meet your specifications
